Halo Touchscreen Wi-Fi Smart Lock in Satin Nickel, exterior.

Also available in Venetian Bronze, Chrome, and Iron Black.

PRODUCT OVERVIEW

Halo™ Smart Locks are Wi-Fi-enabled deadbolts from Kwikset®, manufacturer of smart lock products made for the world you live in. Available in two styles, a touchscreen and a keypad, Halo Smart Locks pair to a homeowner's existing Wi-Fi network to simply and easily enable remote access control, monitoring and, in the future, simplified home automation integration.

The new Kwikset deadbolts are an ideal solution for homeowners interested in upgrading to a secure, stylish lock that simply requires a Wi-Fi network and paired smartphone for control over their front door.

VALUED PRODUCT FEATURES

Simplified Smart Home Experience: Halo Smart Locks connect directly to Wi-Fi to enable smart lock features directly to a smartphone, via the Kwikset mobile app. This set up completely eliminates the need to purchase a third-party smart home hub.

DIY Install: Halo Smart Locks fit seamlessly on standard size exterior residential doors and can be used within minutes of unboxing, once paired to the local Wi-Fi network and connected through the Kwikset mobile app.

Total Front Door Control: Halo Smart Locks give homeowners the convenience of managing, controlling and monitoring the lock from anywhere in the world when connected to the Internet. Homeowners with a Halo Smart Lock will be able to remotely monitor lock status, remotely lock or unlock the deadbolt, manage authorized lock users, generate up to 250 user codes, and schedule or revoke guest access.

Intuitive App Experience: Launching alongside Halo Smart Locks is the Kwikset mobile app. Homeowners will be able to download the app and use it to actively control and manage their Halo Smart Lock, in addition to other features like:

- Manage guest, family and friend access control
- View lock history
- Manage lock settings
- Manage multiple locks in one home
- Manage multiple properties

Evolving Platform: Kwikset is building a robust, diverse automation network with other smart home product and system providers to give Halo Smart Locks homeowners the ability to build a fully automated smart home, starting at the front door.

Flexible Exterior Interface: Available in two styles, Halo Smart Locks give homeowners the ability to choose between keypad and touchscreen functionality. Halo Keypad Wi-Fi Smart Lock is notable for its curved design and push-button keypad while the Halo Touchscreen Wi-Fi Smart Lock features a sleek, modern shape and capacitive touchscreen.

BRAND-BACKED SECURITY

Advanced SmartKey Security™: Both Halo Wi-Fi Smart Locks feature the latest version of Kwikset's patented SmartKey Security. The advanced SmartKey Security provides strong resistance against common break-in methods like torque attacks and lock bumping, and passes the most stringent lock-picking standards (UL 437, par 11.6.). SmartKey Security also allows homeowners to reset their security by re-keying their locks quickly and easily; rendering lost, loaned or unreturned keys useless.

Kwikset Patented SecureScreen™ Technology: Available with the Halo Touchscreen Wi-Fi Smart Lock, patented SecureScreen Technology The touchscreen version features Kwikset patented SecureScreen, preventing against unwanted entry commonly associated with touchscreen products. With SecureScreen, users are prompted to touch two random numbers before entering their access code to encourage fingerprints across the screen.

Kwikset Cloud: Developed to support Halo Wi-Fi Smart Locks, the Kwikset Cloud will launch alongside the new smart locks and is backed by the Kwikset brand commitment to providing the best in home security to customers. The Kwikset Cloud and accompanying web portal will give homeowners more control over their front door security. Features include the ability to manage lock security if an authorized smartphone is lost or stolen, view lock history and manage account security through the web portal. The Kwikset Cloud was developed in partnership with third-party cyber security experts, utilizes advanced encryption to communicate between devices, and will undergo regular cyber security audits.

DEVICE COMPATIBILITY

Kwikset Mobile App: The Kwikset mobile app will be available for free download from compatible smartphone app marketplaces, such as the Apple App Store or Google Play Store. The app will be used for installation and lock set-up, deadbolt locking and unlocking, guest access management and deadbolt monitoring. The Kwikset mobile app will be compatible with both iOS and Android smartphones.
