## PRODUCT OVERVIEW

Halo™ Smart Locks are Wi-Fi-enabled deadbolts from Kwikset®, manufacturer of smart lock products made for the world you live in. Available in two styles, a touchscreen and a keypad, Halo pairs to a homeowner's existing Wi-Fi network to simply and easily enable remote access control, monitoring and simplified home automation integration.

The new Kwikset deadbolts are an ideal solution for homeowners interested in upgrading to a secure, stylish lock that simply requires a Wi-Fi network and paired smartphone for control over their front door. Halo also includes traditional key functionality for peace of mind, in addition to a one touch locking button.

## VALUED PRODUCT FEATURES

**Simplified Smart Home Experience:** Halo connects directly to Wi-Fi to enable smart lock features directly to a smartphone, via the Kwikset mobile app. This set up eliminates the need to purchase a third-party smart home hub.

**DIY Install:** Halo Smart Locks fit seamlessly on standard size exterior residential doors and can be used within minutes of unboxing, once paired to the local Wi-Fi network and connected through the Kwikset mobile app.

**Total Front Door Control:** Halo Smart Locks give homeowners the convenience of managing, controlling and monitoring the lock from anywhere in the world when connected to the Internet via the Kwikset app. Homeowners with a Halo will be able to remotely monitor lock status, remotely lock or unlock the deadbolt, manage authorized lock users, generate up to 250 user codes, and schedule or revoke guest access.

**Intuitive App Experience:** Homeowners will be able to download the Kwikset mobile app and use it to actively control and manage their Halo lock, in addition to other features like:

- Manage guest, family and friend access control
- View/receive updates of lock's activity
- Create, disable and delete codes
- Set schedules for custom user codes
- Manage lock settings
- Manage multiple locks in one home
- Manage multiple properties
- Temporarily disable keypad to prevent unwanted entry

**Evolving Platform:** Kwikset is building a robust, diverse automation network with other smart home product and system providers to give Halo Smart Locks homeowners the ability to build a fully automated smart home, starting at the front door. Lock and check the status of the Halo using voice commands via Amazon Alexa.

**Flexible Exterior Interface:** Available in two styles, Halo Smart Locks give homeowners the ability to choose between keypad and touchscreen functionality. Halo Keypad Wi-Fi Smart Lock is notable for its curved design and push-button keypad while the Halo Touchscreen Wi-Fi Smart Lock features a sleek, modern shape and capacitive touchscreen.

## BRAND-BACKED SECURITY

**Advanced SmartKey Security™:** Both Halo Wi-Fi Smart Locks feature the latest version of Kwikset's patented SmartKey Security. Advanced SmartKey Security provides strong resistance against both common and advanced break-in methods like torque attacks and lock bumping and passes the most stringent lock-picking standards (UL 437, par 11.6.). SmartKey Security also allows homeowners to reset their security by re-keying their locks quickly and easily; rendering lost, loaned or unreturned keys useless.

**Kwikset Patented SecureScreen™ Technology:** Available with the Halo Touchscreen Wi-Fi Smart Lock, patented SecureScreen Technology The touchscreen version features Kwikset's patented SecureScreen, preventing against unwanted entry commonly associated with touchscreen products. With SecureScreen, users are prompted to touch two random numbers before entering their access code to eliminate fingerprint patterns across the screen.

**BHMA Certified to Grade AAA:** Halo meets the highest residential grade performance standards for builder's hardware as certified by the Builders Hardware Manufacturers Association (BHMA) per A156.40 to Grade AAA, the only organization accredited by the America National Standards Institute (ANSI). These standards ensure the quality and durability of locksets through a series of operational and security tests.

## DEVICE + TECHNOLOGY COMPATIBILITY

**Kwikset Mobile App:** The Kwikset mobile app is available for free download from compatible smartphone app marketplaces. The app will be used for installation and lock set-up, deadbolt locking and unlocking, guest access management and deadbolt monitoring. The Kwikset mobile app is compatible with both iOS and Android

smartphones.

In addition, Halo Smart Locks integrate with Amazon's Alexa.
