

KWIKSET KEVO FACT SHEET

KWIKSET KEVO FACT SHEET

Updated 5.20.15

Kevo: Kevo is a Bluetooth-enabled deadbolt that uses Bluetooth Low Energy 4.0 technology to turn your smartphone into an electronic key (eKey). Kevo locks and unlocks quickly with the touch of a finger while your smartphone remains in your purse or pocket, eliminating the need to fumble for keys.

Kevo Mobile App: The Kevo app is available for free download from compatible smartphone app marketplaces, such as the Apple App Store or Google Play Store. The app is used for initial setup, locking & unlocking, sending, disabling and deleting eKeys; viewing history of lock activity; and setting up other configurable features and options of the smart lock.

Positioning (Inside / Outside) Technology: Kevo's patent-pending intelligent positioning technology, Inside / Outside Technology, detects whether an authorized user is inside or outside of the home before granting access to help prevent unauthorized entry.

Compatible Devices: Kevo is compatible with smartphones that support Bluetooth LE 4.0 technology and have an available Kevo mobile app, which includes:

- iPhone 6, 6 Plus, 4S, 5, 5c, 5s
- Fifth generation iPod touch
- Third generation or higher iPad and iPad mini

The Kevo app is also available on the following devices using Android 5.0 Lollipop:

- HTC One M9
- Nexus 6
- Nexus 9
- Samsung Galaxy S5
- Samsung Galaxy S6
- Samsung Galaxy S6 Edge
- Samsung Galaxy Note 4
- Samsung Galaxy Note 4 Edge

Key Fob: Each Kevo comes with an active Bluetooth LE 4.0 key fob that provides the same touch-to-open convenience as an authorized smartphone for users who do not have a compatible device.

Key Functions: Users can send eKeys to family, friends and guests with Kevo-compatible smartphones.

- **Kevo Owners and Admins** are authorized to purchase, send, disable and delete eKeys, view lock history and receive notifications when the door is locked or unlocked
- **Anytime eKey** holders have only locking and unlocking capabilities
- **Unlimited Guest eKeys** allow users to share free, unrestricted access with a guest for 24 hours
- **Scheduled eKeys** allow users to set repeating date and time constraints for the eKey prior to sharing with the guest

Kevo Works with Nest: Kevo works with Nest to enable greater home control convenience. Customers will be able to set their Nest Learning Thermostat to Home and Away modes through the Kevo app.
