Overview:	<ul style="list-style-type: none">• The only one-touch locking motorized deadbolt• Enter your home in a few simple pushes of a button• Easy to install, program and use• Eliminates the need for keys• Back-lit panel for increased visibility

What is SmartCode?

- Electronic keyless entry deadbolt
- With a personal code, enables entrance to the home with just a few simple pushes of a button
- Only product in its category to feature a motorized deadbolt for convenient one-touch locking
- Installs in minutes with just a screwdriver – no hardwiring required
- Eliminates the need for a key

How does SmartCode work?

- Quick and easy to install; requires no hard wiring and is powered by four (4) AA batteries
- Program a personal code between four and eight digits and assign a temporary code to whoever needs it; delete and reprogram as needed
- Activate or deactivate the system's automatic door locking feature with 30-second delay

How secure is a lock with SmartCode technology?

- Features Kwikset's SmartKey re-key technology with BumpGuard™ protection when needed as back-up
- With SmartKey, SmartCode locks pass the most stringent lock-picking standard, UL 437, par. 11.6

In what finishes is SmartCode available?

- Lifetime Brass, Satin Nickel and Venetian Bronze

Where are SmartCode locks available?

- Home centers and hardware stores nationwide
