

# Kwikset® Key Control Deadbolt

## Fact Sheet

---

### *Key Control Deadbolt*

#### **Overview:**

- Re-key your Tenant or Property Manager cylinder at any time in seconds
- Re-key the lock in seconds without removing from the door
- Features SmartKey® re-key technology
- Cost and time saving alternative to master keying

#### **What is a Key Control Deadbolt?**

- A revolutionary cost and time-saving alternative to traditional master key systems for multifamily applications
- Using two cylinders, the system provides independent control of tenant and property manager access
- Because both cylinders feature SmartKey® re-key technology, re-keying is accomplished in seconds without removing either cylinder from the door

#### **Why choose a Key Control Deadbolt?**

- New proprietary keyway adds security—the tenant key will never fit into the Property Manager Cylinder
- The Property Manager Cylinder is concealed when not in use to avoid tenant confusion
- Two separate cylinders allow for more tenant key cuts than a traditional master key system
- Features SmartKey re-key technology enabling the lock to be re-keyed without removing from the door
- Saves time and money by re-keying yourself

#### **What makes Key Control more secure?**

- Patented side-locking bar technology replaces traditional pin-and-tumbler design
- Features BumpGuard™ protection to pass the most stringent lock-picking standard, UL 437, par. 11.6

#### **Where are Key Control Deadbolts available?**

- At your local Kwikset dealer
