

## **KWIKSET® SMARTKEY™ RE-KEY TECHNOLOGY FACT SHEET**

### **Overview:**

- Enables re-keying in seconds without removing the lock from the door
- Withstands the highest levels of UL testing to resist lock picking
- Features BumpGuard™ to protect against lock bumping

### **What is SmartKey?**

- A re-key technology offered on keyed entry products from Kwikset, including deadbolts, knobs, levers, and handlesets. It is also included on Kwikset's electronic locks as the back-up keyway.
- Provides the flexibility to re-key a lock quickly and easily without removing it from the door

### **Why choose a lock with SmartKey technology?**

- Allows frequent re-keying with utmost convenience and no additional expense
- Patented design provides proven protection against lock picking and lock bumping, providing enhanced home security and peace of mind

### **Why would I consider re-keying my locks?**

- Lost, stolen or unreturned keys
- Recently moved
- To increase a home's security
- One-key convenience for all Kwikset locks
- Remodeling, upgrading or updating
- Tenant turnover

### **How does SmartKey work?**

- SmartKey products include a SmartKey learn tool, new key and instructions to re-key
- Re-key as easy as 1-2-3:
  1. Insert functioning key and turn ¼ turn clockwise
  2. Insert and remove the SmartKey learn tool. Remove functioning key
  3. Insert new key and turn ½ turn counter-clockwise. Your lock is now re-keyed

### **How secure is a lock with SmartKey technology?**

- BumpGuard is a patented side locking bar that replaces the traditional pin and tumbler design, providing protection against lock bumping.
- Cylinder uses two steel balls inserted into the front of the cylinder face to provide improved drill resistance
- SmartKey deadbolts pass the most stringent lock picking standard, UL 437, par. 11.6

### **Where are SmartKey locks available?**

- Home centers and hardware stores nationwide
