

How to Enable or Disable Two-Step Verification for Your Kwikset App Login

Launch the Kwikset App on your mobile device

- Tap the **menu icon** located at the **top-left corner** of the home screen.
- Select Account Settings from the menu.
- **Toggle ON** to enable the feature.
The switch will turn **green** when activated.
- **Toggle OFF** to disable the feature (not recommended for security reasons).

Important Information About Two-Step Verification

Default Security Setting

Two-Step Verification is automatically enabled following the initial installation of the Kwikset App. This feature is designed to provide an extra layer of protection for your account.

Security Recommendation

For enhanced security, it is strongly recommended that you keep Two-Step Verification enabled. This helps safeguard your account against unauthorized access.

Verification Code Delivery

When Two-Step Verification is enabled:

- You will receive a **verification code via text message** sent to your registered phone number.
- You may also choose to receive the code **via email**, sent to your registered email address.
